Accurate Labs Is Expanding

Accurate Environmental Labs opened for business 25 years ago starting with their lab in Stillwater, then opening additional labs in Tulsa and Oklahoma City. The company has experienced steady growth since its inception. In fact, the Stillwater facility has more than quadrupled in size since 1990. **Accurate Labs in Tulsa has recently undergone facility updating and remodeling,** as well. The company's Field Services division has weekly routes providing field and sampling services throughout the state. **The field service routes also continue to expand,** allowing Accurate Environmental to offer their superior service to more clients at an unbeatable value.

In 1998, **Accurate Training Center** was established as another division of Accurate Environmental and began offering continuing education and renewal training for water and wastewater operators and laboratory technicians. **They now offer 14 different certification classes, in addition to the continuing education and renewal classes.** **Accurate Training Center is the only commercial training center in Oklahoma providing ODEQ approved operator certification training and testing.** They schedule **over 60 classes per year** between their headquarters in Stillwater and their lab and training center in Tulsa. **Accurate Training Center** also provides **on-site certification, renewal, and custom training** for their clients.

Accurate Engineering Services offers operational assistance, troubleshooting and process control services to water and wastewater systems. These services are also available through **Accurate's Environmental Insurance program,** which is a monthly retainer service that provides **ongoing operational assistance including regular site visits and regulatory reporting assistance.**

Accurate Lab Supplies is the lab supply sales division of Accurate Environmental. They are an **authorized Hach reseller** and **provide laboratory equipment and supplies** needed by most water and wastewater treatment plant labs. **Supplies can be delivered for free to clients** on Accurate's weekly field service routes, or they can be drop shipped directly to the client.

Over the past 25 years **Accurate Environmental** has demonstrated that they possess the **innovative leadership and passion for the improvement of our environment** that has allowed them to become the **largest commercial environmental lab in Oklahoma** servicing clients nation-wide. Their **staff of experienced scientists, engineers, and industry experts** has helped solidify their place as one of the **nation's most unique environmental service providers** and will **continue to grow and expand** in order to **provide the best service possible** to their clients.

Check out Accurate's new website!

Accurate Environmental is finishing up a major revamping of their website! The new site has been redesigned to make navigating and finding the information you need more intuitive and user-friendly. From the new home page, visitors can choose the company division of interest, which allows them to find exactly what they are looking for quickly and easily. Visitors can view company information, find operator and laboratory technician resource links and downloads, view class schedules and register for training, sign up for the monthly newsletter, and much more! The "Client Access" feature is still available so that clients can view their reported data 24 hours a day, seven days a week. Visit www accuratelabs.com and let us know what you think, or if there are any other features that might be useful to your system.

Questions, comments, or suggestions? If you have a question or comment about something you've seen in our newsletter, or if you have suggestions about topics you would like to read about in future newsletters we would like to hear from you. Email your comments or suggestions to jeff@accuratelabs.com.

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
