Phase I and Phase II Environmental Site Assessments

An environmental site assessment is a report prepared for a real estate holding that identifies potential or existing environmental contamination liabilities. The analysis typically addresses both the underlying land as well as physical improvements to the property. If the Phase I assessment determines a site is considered contaminated, a Phase II environmental site assessment may be conducted including a more detailed investigation involving chemical analysis for hazardous substances. The actual sampling of soil, air, groundwater and/or building materials is typically not conducted unless a Phase II site assessment is required.

Among the many services that **Accurate Environmental** offers, Phase I and Phase II environmental site assessments are well suited to the **multi-disciplinary approach** that Accurate takes with any environmental project. **A licensed engineer working in conjunction with a team of environmental scientists and industry experts provides Accurate Environmental clients with a range of services and support that no other environmental services company can offer.** Accurate Environmental Services produces **professional** environmental site assessment reports that are **thorough and detailed.** Accurate can provide environmental site assessments anywhere in the state for private or commercial needs.

For more information about environmental site assessments by **Accurate Environmental Services**, contact **David Kincannon, P.E.** at **(800) 516-5227** or email **David@accuratelabs.com**.

Annual DEQ License Renewal Training

Don't forget! You need to have your annual DEQ renewal training completed by June 30th. Accurate Environmental Training Center has 4-hour water and wastewater refresher classes scheduled every Tuesday and Thursday throughout the month of June. Accurate refresher classes discuss topics including, but not limited to, drinking water and wastewater treatment processes, sampling, and laboratory quality assurance and quality control.

Renewal classes fill quickly, so don't wait. Call or go online today to reserve your spot in a 4-hour annual refresher class at **Accurate Environmental Training Center.** Contact **Jeff Clarke** at **(800) 516-5227** or email **Jeff@accuratelabs.com.**
