If You Need Lab Technicians, Then You Need Accurate Labs & Training Center

Accurate Labs & Training Center has been providing ODEQ Water & Wastewater certification and renewal classes for over 20 years. All AETC lab instructors have **over 20 years of experience working in a lab**, and **more than a decade of experience teaching operator and lab technician classes**. Accurate Labs & Training Center maintains a **95% passing rate** for the "C" Laboratory certification.

Operators with laboratory training have a better understanding of the importance of process control testing, and how to use those results to improve treatment process efficiencies. Accurate Labs & Training Center classes provide **more hands-on lab training than any other classes**. Approximately half of the student's class time is spent in a working lab, getting **hands-on experience with state-of-art equipment under the guidance of highly experienced and educated laboratory experts**. Instructors work **one-on-one** with each student in the lab, ensuring that the student is comfortable performing the various tests that were covered in the class. As they work with the students, instructors are able to identify weak points in the student's understanding or technique and can gear the **one-on-one sessions to meet the individual student needs**.

The goal of Accurate Labs & Training Center is to produce the best operators and lab techs possible. It is important that Accurate students are comfortable with the skills they develop in class. That is why **students are always encouraged to contact Accurate instructors with any follow up questions or concerns** they may have after returning to their home facilities. A huge benefit of the Accurate Training program is the **post-training support** available so operators don't feel trapped in a situation where they are faced with an unfamiliar problem and no experienced operators to rely on for advice and support.

There is no equal alternative to Accurate Labs & Training Center laboratory training classes. If you are looking for a **comprehensive training** program with the **most hands-on training available**, then look no further. Accurate Labs & Training Center is the premier laboratory technician training program in Oklahoma. Contact **Jeff Clarke** for more information or to register for classes.
