NELAP ACCREDITED TNI LABORATORY

ATC renewal class schedule and DEQ requirements on page 2.

It's Getting Late… Don't Let Your License Lapse!

This is it! There's little time and few classes available to get your DEQ renewal training done by the end of June. Everyone must have at least 4 hours of classroom training for their water and/or wastewater license renewals. To maintain your ODEQ license(s), you must acquire the required renewal training and pay the ODEQ license renewal fees by the end of June. Once you've completed your renewal training, ATC will submit your training hours to ODEQ for you. If you've already received your renewal letter from ODEQ, you can pay the renewal fees before you attend your renewal class. That is recommended to ensure ODEQ receives your renewal fees and proof of training by June 30th.

ATC renewal classes are designed to provide relevant, up to date information to help operators and lab technicians improve their knowledge and skills while also meeting the **annual renewal training** requirements **for all levels** of certification. Morning and afternoon classes on each class day allow for **4 or 8 hours** of renewal training in one day. Topics include, but are not limited to, Sampling, Math, Disinfection Methods, Hands-On Lab, and Troubleshooting. ATC renewal classes are designed to be informative and relevant to current water and wastewater operational standards. What are you waiting for? **Schedule your training online or by phone before it's too late!**

See page 2 for the remaining June renewal classes.
All ATC renewal classes can be used to renew ANY level DEQ certification.

If you have any questions or would like more information about **ODEQ renewal or certification training**, contact **Jeff Clarke** at Jeff@accuratelabs.com or call **(800) 516-5227 ext. 144**
