19 - 23 A Water Lab

Online Class Registration

These days, almost anything can be done online. Everything from buying a new pair of shoes to booking your next vacation is only a few clicks away. Accurate Environmental Training Center classes are no different. Operators can visit the Accurate Environmental website to view class schedules and descriptions, as well as, registering and paying for classes. When you use the online registration form, you will receive an email confirming your enrollment so that you know the registration was received and accepted.

Of course, not everyone prefers doing business online, so Accurate Training Center is more than happy to assist clients with class registrations over the phone. Someone is always available to answer questions, help in the selection of classes, and to provide guidance when completing the ODEQ application paperwork associated with the various certification exams.

Visit Accurate Environmental Training Center online at www.accuratelabs.com to find more information about Accurate's environmental training program. While there, take some time to check out the wide range of other environmental services they provide to help you understand and meet the needs of your system.

For questions or registrations contact **Jeff Clarke** at (800) 516-5227
or email jeff@accuratelabs.com.

Certified Operator Services

Accurate Environmental has worked closely with water and wastewater treatment systems throughout Oklahoma for more than 20 years, so they understand the challenges that your system faces on a daily basis. Add the complication of losing an operator or supervisor unexpectedly, and things can get serious very quickly. Accurate Environmental has 12 ODEQ certified operators and lab technicians on staff available to offer assistance when you need help keeping your system running smoothly and efficiently during difficult staffing situations.

No other environmental services provider in the State can match Accurate's experience and expertise in the water and wastewater industry. Their certified operators can provide services ranging from basic operation and maintenance, to advanced operations and management. Regardless of size or complexity, Accurate Environmental is equipped to provide any level of support that your system needs including operation, maintenance, management, sampling and testing, reporting, and technical support.

After a consultation and plant evaluation, Accurate Environmental can help you determine the optimum services for your unique situation. Whether you need temporary assistance with day-to-day operations or long-term facility management services, Accurate Certified Operator Services is here to help keep your treatment systems running for the health and safety of our communities.
