## Stage 2 DBPR Assistance

Starting in October, Schedule 3 and 4 Drinking Water Systems must begin complying with the EPA's monitoring requirements for the Stage 2 Disinfection Byproduct Rule (DBPR). By that time, each system should have an established monitoring plan approved by the EPA. If your system has received communication from EPA Region 6 regarding Technical Support ending for your system to receive assistance with the creation of your Compliance Monitoring Plan, **Accurate Environmental Services (AES)** can help you complete the process of developing your monitoring plan to submit to the EPA.

Once your system's plan has been approved by EPA and implemented, **samples must be analyzed by an approved laboratory, such as Accurate Labs.** Accurate Labs has been providing analytical services to the water and wastewater industry for **23 years** and is the **only commercial lab** in Oklahoma that is **fully certified for drinking water analysis.** They are **NELAP (nationally) and ODEQ (state) certified** and recognized for their unmatched **customer service, high quality data, and scientific integrity.**

Accurate Labs has been working closely with EPA to ensure that compliance plans are created quickly and correctly. Contact **Accurate Labs** today to talk to a **friendly, knowledgeable** person that can assist you throughout the process of establishing your **monitoring plan**, organizing sampling events – all the way to **analyzing** the samples and **reporting** results. Call today or visit them online at [www accuratelabs.com](http://www accuratelabs.com).

## Lab Training Like No Other

Knowledgeable and well-trained lab technicians are essential to ensure the effectiveness of treatment processes for compliance with State and Federal regulations, not to mention the health and safety of our communities. **Accurate Environmental Training Center (AETC)** classes provide students with a solid understanding of basic chemistry, lab equipment and safe laboratory procedures. AETC students receive their training from **highly educated industry experts** in a **nationally certified lab** using **cutting edge analytical instruments.** **In-depth classroom instruction**, along with **extensive hands-on training**, means AETC students will have a **better understanding** of the material and the **practical skills** necessary to properly perform analyses at their own facilities. **Accurate Environmental** also provides **support for operators and lab technicians** even after they have completed the training. Students are encouraged to contact instructors with any lab or operational questions they may have after returning to their facilities – an invaluable resource for the operators we depend on for safe drinking and recreational waters. **Contact Jeff Clarke** for more information or to register for classes at **(800) 516-LABS** or email [jeff@accuratelabs.com](mailto:jeff@accuratelabs.com).

## STILLWATER CLASSES

### JULY

**05** Open Exam Session #11212  
**09 – 11** "D" Water & Wastewater Oper  
**15 – 16** "C" Wastewater Operator  
**22 – 25** "C" Water Laboratory

### AUGUST

**02** Open Exam Session #11213  
**06 – 08** "D" Water & Wastewater Oper  
**12 – 13** "C" Water Operator  
**26 – 29** "C" Wastewater Laboratory

### SEPTEMBER

**06** Open Exam Session #11440  
**10 – 12** "D" Water & Wastewater Oper  
**16 – 19** "A/B" Water Laboratory

### OCTOBER

**21 – 24** "A/B" Wastewater Laboratory

## TULSA CLASSES

### JULY

**12** Open Exam Session #11214  
**23 – 25** "D" Water & Wastewater Oper

### AUGUST

**09** Open Exam Session #11215  
**14 – 15** "C" Wastewater Operator  
**20 – 22** "D" Water & Wastewater Oper  
**26 – 29** "B" Wastewater Operator

### SEPTEMBER

**13** Open Exam Session #11436  
**18 – 19** "C" Water Operator  
**24 – 26** "D" Water & Wastewater Oper

### OCTOBER

**04** Open Exam Session #11437  
**16 – 17** "C" Wastewater Operator  
**29 – 31** "D" Water & Wastewater Oper

## Still Need Renewal Hours?

If you find yourself reading this article and realizing that you did not get your 4 hours of renewal training this year, take a deep breath, relax, and refer to the training schedule above. **Accurate Environmental** certification classes can also be used to meet annual renewal training requirements. Attending a half-day session of any **AETC** certification class will fulfill your annual renewal training requirement. Morning and afternoon sessions are available on the 1<sup>st</sup> and 2<sup>nd</sup> days of class. If you would like more information, or to register for **Accurate Environmental Training** classes, contact **Jeff Clarke** at **(800) 516-LABS** or email [jeff@accuratelabs.com](mailto:jeff@accuratelabs.com).

**Accurate Environmental** is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

**Accurate Labs** is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

**Accurate Environmental Training Center (AETC)** is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

**Accurate Laboratory Supplies (ALS)** is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

**Accurate Field Services**, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

**Accurate Engineering Services (AES)** provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
