Accurate Environmental Training Center

For more than twelve years Accurate Environmental Training Center has been setting the standard for water and wastewater operator training in Oklahoma. All of our instructors hold degrees in various disciplines and levels of higher education. AETC utilizes diverse educational backgrounds and years of industry experience to provide training classes with substance and insight so that our students are equipped with the knowledge and skills needed to become an effective plant or laboratory operator, and to pass the ODEQ certification exams. With state-of-the-art classrooms in Stillwater and Tulsa, and seven dedicated instructors, AETC has the knowledge and experience necessary to provide the highest quality training and convenient scheduling at affordable prices. AETC is proud to reward student effort by offering incentive programs for high performance on certification exams, in addition to our Class “C” and “D” Operator Guarantee. Contact us today for more information about AETC training programs.

Selecting a Laboratory Service Provider

When selecting a laboratory service provider, there are a few things that should be considered. How long a laboratory has been in business is a good indicator of the lab’s quality of service. Accurate Labs has been in business for **20 years**, while continuously expanding our facilities and capabilities. Since day one, providing you with **quality data** and exceptional **customer service** has been our priority. Staff turnover is also a very important aspect to consider. When a lab has high turnover, it is difficult to provide consistent, quality data. Our management staff averages 10 years of **experience** with Accurate Labs. A third and very important factor to consider is laboratory certifications. Is the lab certified to run the analyses that you require? What accrediting bodies is the lab certified by? Just because a lab can run certain analyses, does not mean that their data can be used for reporting to regulatory agencies. Accurate Labs is **state certified** by the Department of Environmental Quality (ODEQ), and **nationally certified** by the National Environmental Laboratory Accreditation Program (NELAP). NELAP certification insures that the lab has met strict performance and quality control standards set by the NELAC Institute. With this nationally recognized certification, you can be **confident** that reported data is **accurate** and **precise**. We are also the largest commercial environmental lab located in Oklahoma that is fully certified for drinking water analysis. When all of this is factored in to your laboratory selection, **Accurate Labs** is the obvious choice.

Tulsa Classes

SEPTEMBER

13 – 16 B Wastewater Oper
13 – 17 A Wastewater Oper
28 – 30 D W&WW Oper

OCTOBER

05 (am) Gen. WW Oper Ref
