Environmental Sampling

Accurate Certified Field Service Group provides field and sampling services for drinking water, wastewater, soil, sludge, and hazardous waste analysis. Accurate Field Services employs highly trained and certified, professional field service technicians traveling across the state on weekly sample pick up routes. Accurate Field Services offers clients a fast, economical, and safe way to get samples to Accurate Labs for analysis. Simply start by contacting one of Accurate Labs 3 locations to obtain your free EPA-approved sample bottles. Use the bottles to collect and properly preserve your samples, fill out any required documentation, and then rest easy knowing that once the samples have been picked up by an Accurate Field Service Technician, they will arrive at the lab and be analyzed on time. Accurate's sample pick up routes extend throughout the state and can be scheduled for weekly, monthly, or stand-by pickup.

Accurate Field Service technicians can perform complete sampling services using EPA methods and state-of-the-art automated sampling equipment. With a fleet of 13 vehicles and 20 auto-samplers, Accurate has the experience and resources to perform any type of environmental sampling you may need, in any location across the state. Accurate Field Services has decades of experience providing the following sampling services to their clients:

- NPDES/OPDES monitoring for industrial and municipal discharges
 - Fully automatic or manual sample collection
- Drinking water sample collection
 - Total Coliform, TTHM, HAA5, VOC, etc...
- Monitor well purging and sample collection
- Storm water sample collection
 - Automatic or manual sample collection
- Soil sample collection
 - TCLP, RCRA, Metals, etc...
- Drum sample collection
- Custom sampling events to meet your specific needs

IMPORTANT: Certification exams are offered on the last day of class. You must submit an exam application to the ODEQ at least 3 weeks before your scheduled test date. Copies of the DEQ application can be downloaded from the Accurate Labs and Training Center website at

www.accuratelabs.com/training-center

You can also register for classes online, download copies of the DEQ operator study guides and lab manuals, and explore the wide range of services Accurate offers.

For more information, or to register for training contact Jeff Clarke at (800) 516-5227 or email Jeff@accuratelabs.com

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award-winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
