Keep It Current Or Pay the Penalty

Keeping your ODEQ water and wastewater certifications current is the sole responsibility of the operator. With everything else that we deal with on a daily basis, it can be very easy for that detail to get overlooked, and to let the license lapse without realizing it. Sometimes employers help operators keep track of this, but when the license is allowed to lapse, it is the operator who will lose his license, rendering him unable to legally work in a treatment plant. Every operator needs to take responsibility for their certifications as if their job depends on it... because it does!

Accurate Environmental Training Center (AETC) can help you stay on top of your certification requirements. If you have questions about your license, or you do not remember the last time it was renewed, **AETC can help you find out the status of your license, then assist you in scheduling any necessary training and provide you with the required paperwork to submit to the ODEQ so that your license is current and legal.** There is a limited amount of time that can pass before an expired license is canceled, in which case the operator must re-take the certification exams in order to become certified again. Even though a recently expired license can be renewed, the renewal fees, late fees and penalties often add up to more expense than re-taking the class and exam. **Don't wait** too long. Letting your license lapse and then going back and **catching up is often more expensive and time consuming** than taking care of it each year as intended.

AETC has worked with thousands of operators over the last 15 years, helping them obtain, upgrade and renew operator and laboratory certifications. By applying their **extensive experience with operator certification**, AETC can **answer your certification questions** and help you **choose the steps to take** on the way to obtaining your water and wastewater license, or renewing your current certification. **If you have questions** about whether or not your license is current, or if **you need to find a class** for continuing education credits or certification , **contact Accurate Environmental Training Center.**

AETC Class Schedules and Online Training Calendar

For more information about upcoming AETC environmental training classes, visit www.accuratelabs.com. From there you can download PDF versions of the 2014 class schedule, or use the website training calendar to find and register for upcoming classes. The training calendar allows you to view classes month by month, view class descriptions that include class/exam numbers and exam application deadlines. Class registrations can also be made through the website using the link at the bottom of each calendar page. And as always, AETC is happy to assist you with registrations over the phone or by email, too.

Accurate Environmental is one of the nation's most unique and comprehensive environmental service providers. They not only operate the largest commercial environmental lab in Oklahoma and state-of-the-art operator and laboratory training centers, but also provide laboratory supply sales, field and sampling services with weekly sample pick-up routes, as well as environmental and engineering services.

Accurate Labs is comprised of three full-service laboratories, including our headquarters in Stillwater and two additional labs in Tulsa and Oklahoma City. They provide analytical services for drinking water, wastewater, groundwater, soil, sediment, sludge, and hazardous waste. Accurate Labs is nationally certified through The NELAC Institute, and the only commercial lab in Oklahoma that is fully certified for drinking water analysis.

Accurate Environmental Training Center (AETC) is an award winning training center offering operator and laboratory certification and renewal classes at their classrooms in Stillwater and Tulsa. Using multiple instructors for each class, and various teaching methods, such as pie charts and standard formulas for math, AETC is able to tailor training to meet the needs of each individual student.

Accurate Laboratory Supplies (ALS) is an authorized Hach dealer that can save you valuable time and money on all your laboratory supplies, chemicals, and equipment needs with one simple phone call. ALS even offers FREE DELIVERY to clients along their routine sample pick-up routes.

Accurate Field Services, with a team of well-trained field service technicians, provides field and sampling services throughout the state for drinking water, wastewater, soil, sludge, and hazardous waste. Accurate Field Services also has weekly sample pick-up routes to provide their clients with a fast, economical, and safer way to get samples to Accurate Labs for analysis.

Accurate Engineering Services (AES) provides expert technical assistance related to municipal and industrial water, wastewater, solid wastes and biosolids, industrial pretreatment, and environmental site assessments. AES is here to help your system meet EPA and DEQ rules and regulations, improve operation performance, and reduce operating costs.
